- Heavy Soiling : Dilute 8 – 12ml in 1 Ltr of water.

#### **Technical Data**

- Appearance            Clear liquid.
- Colour                    Turquoise.
- Odour                     Perfumed
- Viscosity                Viscous
- Solubility                Soluble in water.
- pH                         10 - 12

#### **Cleaning Tips**

- Wash and dry dark or very brightly colored new items separately until excess dye has bled out. this avoids having the dye from new clothes transfer onto other items in your wash.
- Turn your dark clothes inside-out for laundering. This will help keep the colors from fading and will reduce pilling on the outer surfaces of your clothing.
- If possible, wash heavily soiled clothes separately from lightly soiled clothes. Heavy soils can transfer onto other items in the wash, causing whites and light colored items to appear dingy.

#### **Packaging**

5 Kg , 35 Kg , 50 Kg , 100 Kg.

The above data is typical of normal production and should not be taken specification.
